

Rotary Pipe Positioner RSV 1500-2000

RSV is dedicated for clamping and turning of pipes and profiles. Together with plasma rotator and advanced software modules and libraries from MicroStep it offers the full range of pipe based applications.

Technical parameters for RSV 1500

Min. diameter of tube	100 mm
Max. diameter of tube	1500 mm
Max. length of tube	12000 mm
Max. weight of tube	12000 kg
Clamping	four points chuck

Technical parameters for RSV 2000

Min. diameter of tube	100 mm
Max. diameter of tube	2000 mm
Max. length of tube	12000 mm
Max. weight of tube	7000 kg
Clamping	four points chuck

Please note: Some parameters (e.g. Max. thickness of material, Total stroke etc.) vary with the machine type the tool station is installed upon.
