

Plasma Straight Tool Station

A standard tool station used for straight (vertical) cutting.

Technical parameters

| | |
|----------------------------|--|
| Degrees of freedom | 2 (Y and Z axes) + X on the machine |
| Max. thickness of material | according to a plasma source (max. 100 mm) |
| Total stroke (Z) | 195 - 350 mm |
| Positioning speed in Y | max. 40 m/min |
| Positioning speed in Z | max. 9 m/min |

Please note: Some parameters (e.g. Max. thickness of material, Total stroke etc.) vary with the machine type the tool station is installed upon.
