

Waterjet Multi-tool Station

This tool station with up to 4 cutting nozzles is designed for simultaneous cutting of identical parts with waterjet technology.

Technical parameters

| | |
|--------------------------------|--------------------------------|
| Degrees of freedom | 2 (Y and Z) + X on the machine |
| Max. thickness of material | 150 mm |
| Total stroke (Z) | 200 mm |
| Positioning speed in Y | max. 35 m/min |
| Positioning speed in Z | max. 20 m/min |
| Max. number of cutting nozzles | 4 |
| Distance between outer nozzles | 200 - 1200 mm |

Please note: Some parameters (e.g. Max. thickness of material, Total stroke etc.) vary with the machine type the tool station is installed upon.
