

HEAD PROTECTION

HELMETS & SHIELDS

GCE's program for labour protection includes a variety of devices for head and face protection. Lightweight helmets in different materials (polycarbonate, fiberglass reinforced or cellulose fiber) to protect the entire head where to mount the lens of desired shade. A flip-up frame (optional) can be mounted on some models to allow easy switch from a shaded lens to a clear one.

EN 175

Hand shields in different materials (polyamide, nylon or cellulose fiber) for face protection, with different sizes of window to allow a perfect view of the workpiece.

Users can choose among different shapes according to preference to have always the best protection according to welding position. Easy replacement of lenses.

All our PPEs conform to standard EN 175.
