

Thermanit 25/09 CuT

TIG rods, high-alloyed, stainless

| Classifications | | | | |
|-----------------|----------|----------|--|--|
| EN ISO 14343-A | AWS A5.9 | Mat. No. | | |
| W 25 9 4 N L | ER2594 | ≈1.4501 | | |

Characteristics and typical fields of application

Super duplex stainless steel; resistant to inter-crystalline corrosion.

Very good resistance to pitting corrosion and stress corrosion cracking due to the high CrMo(N) content (pitting index ≥40). Well suited for conditions in offshore application, particularly for welding of super-martensitic stainless steels (13 % Cr); extra low hydrogen in the filler material available on request.

Service temperature: -50 °C to 220 °C (-58°F to 428 °F).

Base materials

1.4515 – GX3CrNiMoCuN26-6-3; 1.4517 – GX2CrNiMoCuN25-6-3-3; 25 % Cr-superduplex steels such as Zeron 100, SAF 25/07, FALC 100 UNS S 32750, S 32760
