CEPRO - PROTECTING PEOPLE AT WORK

CEPRO develops safe setups for welding and grinding sites, to effectively protect people and the surrounding area from danger. Site safety is an indispensable part of solid operational management. In addition, we share our extensive expertise in the field of legal safety requirements with our business relations.

International market leader

We combine all the knowledge and expertise found in today's sector in our products, services and processes. We treat every request with due care and attention and work to tailor our solutions to the individual requirements of the client or end user. At CEPRO, we consistently invest in knowledge, training and relationships. This allows us to guarantee consistent and dependable quality and solid service in safety that complies with international regulations. It's what has made CEPRO the global market leader in its sector.

Loyal and highly motivated employees

We don't just go for gold when it comes to safety and satisfied clients. We want the best for our own employees too. And as a result, they tend to be very happy in their jobs. This expresses itself through strong loyalty towards both CEPRO and our business partners, leading to long-term and constructive relationships. Thanks to fixed contacts, our clients and suppliers always know who they are dealing with within our firm – and are very positive about the experience.

In addition, CEPRO's employees are distinguished by their high level of flexibility. This allows them to consistently adapt to new developments in our dynamic society and develop the best possible solutions for the changing needs and wishes of our clients. What's more, these aspects – flexibility, commitment and job satisfaction – can all lead to further cost savings for our clients!

CEPRO delivers on its promise of dependable quality and service in safety

We do so on the basis of our 6 Ps: Products, People, Protection, Profit, Pure and Planet.

- **Products:** We offer an extensive range of products, training programmes and services that consistently deliver the dependable quality required to set up safe welding and grinding sites in compliance with international legislation.
- **People:** Our employees work to gain an in-depth understanding of our clients' specific requirements, processes and wishes – and enjoy doing so.
- **Protection:** We offer employees optimal protection against welding light, noise and heat. This leads to less absence due to illness, reduced risk of fire and potential production loss as a result of damage.
- **Profit:** For honest business dealings, you need to be able to rely on each other and talk on an equal footing. That's why we work to honour our agreements and remain transparent at all times.
- **Pure:** Coordinating with the client is an integral part of each of our processes. The result? Clear communication.
- **Planet:** And as a firm, it's only logical that we treat the built-up environment in which we use this technology with due care and responsibility. That's why we have drawn up rules on how to behave and set them down in our Code of Conduct. We only work with companies that also attach strong importance to corporate social responsibility and sustainability.

WELDING LIGHT

The main dangers of unprotected exposure to welding light are: actinic conjunctivitis (during short-term exposure), cataract (by prolonged exposure) and skin burn. The latter can also lead to skin cancer. The welder protects himself by wearing a welding mask and protective clothing but bystanders are exposed to the same dangers. This is why it is important to protect bystanders in the work place to prevent long-term illness.

When protecting the welding area, it is important not to isolate it from other work areas which is one of the reasons why a welding curtain should be made of transparent material. This not only helps to keep an overview of the work progress, but also allows for a quick response in the case of emergencies. It also prevents the welder from suffering from claustrophobia.

CEPRO offers a large range of welding light filtration products which all filter harmful welding light.

Certification

All CEPRO products have been approved according to the European EN ISO 25980 standard and are regularly retested and re-certified. Therefore customers are always assured of obtaining a safe product. The standard establishes requirements with regard to:

- Filtration of harmful ultraviolet (UV) and still visible blue light radiation.
- UV stability. This feature allows an approved CEPRO product to offer long term filtration properties.
- Flame extinction; if a CEPRO curtain catches fire, the material will extinguish automatically after the seat of the fire has been extinguished.

CEPRO products offer protection. They prevent actinic conjunctivitis, cataract, burnt skin, create a safe environment for bystanders and considerably reduce medical costs.

Available colours

CEPRO supplies transparent welding curtains and strips in three different colours: CEPRO Orange-CE, CEPRO Bronze-CE and Cepro Green-6. These colours provide excellent filters against harmful welding light and also offer protection against irritating (not harmful) welding light.

CEPRO also supplies a Green-9 colour. Separations of this material are opaque and extremely suitable for the shielding of several separate welding work areas without causing any nuisance to other welders.

Available products

The CEPRO range includes a large variety of products such as:

- Welding curtains for the shielding of large surfaces.
- Welding strips (2 of 3mm thick) for situations where mechanical load-bearing capacity is required.
- Suspension and mounting parts for mounting strips
- Welding sheets (1mm thick) for larger surfaces.
- Impact plate, a hard impact resistant material made of polycarbonate.

Each of these CEPRO products has been developed for use in specific working conditions for the optimal fit-out of a workplace.

5 cm / 33% overlap (1 hole overlap)

➤ 10cm / 66% overlap
(2 holes overlap)

➤ 5cm / 33% overlap
(1 hole overlap)

1 ➤ Open the clip on the folding line.

2 ➤ Press the clip onto the tube.

3 ➤ Push the bolts through both of the round holes in the middle of the clip.

4 ➤ Slide the overlapping strips over the bolts. Alternately assemble the strips concavely and convexly. For a 10cm overlap use both pre-punched holes and for a 5cm overlap only use the outer holes.

5 ➤ Close the clips and tighten the nuts and bolts.

6 ➤ If you have used a 5cm overlap then you can use the filling pieces in the openings between the clips.

► SPARKS AND SPATTER

Welding and grinding sparks are a significant issue and pose hazards for welders and co-workers in the welding and grinding workplace. Not only can sparks cause burns and thus serious personal injury to workers, but they can also cause a significant potential loss to the production process which can have a negative influence on the work of other personnel.

One of the major costs of inadequately protecting the working environment from sparks and welding spatters is damage during production which affects quality. Sparks and welding spatters pose a serious fire risk. It is not without reason that many insurers set demands for covering and shielding of flammable and / or costly materials in the vicinity of welding and grinding worksites.

Effective protection of products from welding spatter requires the use of non-combustible materials. This needs careful consideration. Specific applications and work situations often require unique solutions and customized products. Only tested and approved products should be chosen for maximum security against liability. CEPRO can provide these quality products.

CEPRO offers an extensive product package to provide shielding against sparks and welding spatters. The choice depends on the type of risk, the frequency of use, the proximity of the spark source and the different environmental factors. Products can be supplied for horizontal applications (welding blankets) or vertical solutions (curtains). Often it is also necessary and possible to supply custom made products.

► Certification

The European standard EN 13501-1 provides the reaction to fire classification procedure for all products and building elements. According to this standard, reaction to fire is the response of a product in contributing by its own decomposition to a fire to which it is exposed, under specified conditions (not to be confused with the fire resistance).

All CEPRO welding blankets comply with the most stringent requirements for each quality. We hereby guarantee our clients a high-quality product, which will ensure a safe workplace, at all times.

For the best possible guarantee against liability, one must select products that are tested and approved according to the above mentioned standard.

► Available products

The CEPRO range includes a large variety of products such as:

- Premium welding blankets, produced from high quality raw material.
- Basic welding blankets, all-round blankets with an excellent price - quality ratio.
- Economy welding blankets, combine quality with a competitive price.
- Carbon felt welding blankets, light weight, scratch free and flexible.

WELDING SCREENS

The main dangers of unprotected exposure to welding light are: arc eye (during short-term exposure), cataract (by prolonged exposure) and skin burn. The latter can also lead to skin cancer. The welder protects himself by wearing a welding mask and protective clothing but bystanders are exposed to the same dangers. This is why it is important to protect bystanders in the work place to prevent long-term illness.

When protecting the welding area, it is important not to isolate it from other work areas which is one of the reasons why a welding curtain should be made of transparent material. This not only helps to keep an overview of the work progress, but also allows for a quick response in the case of emergencies. It also prevents the welder from suffering from claustrophobia.

In addition to a wide-range of other products, CEPRO can also provide the necessary materials to construct a welding booth as a non-permanent fixture.

We can also supply a mobile welding booth which is suitable and easier to move to different locations. Not only do these booths provide protection but they also offer flexibility for organizing workspace. They provide an optimal solution because they can be quickly dismantled and removed from the work floor when welding work is not being carried out.

Certification

All CEPRO products used in our welding screens have been approved according to the European EN ISO 25980 standard and are regularly retested and re-certified. Therefore customers are always assured of obtaining a safe product.

Available products

The CEPRO welding screens programme is divided into 4 product groups which are suitable for various applications.

- **CEPRO Robusto welding screens**

Very high quality screens. Because they are solidly built they can be used in even the most demanding working conditions.

- **CEPRO Omnium welding screens**

Sturdy and stylish screens. The CEPRO Omnium welding screen is an all-round welding screen and often used in difficult working conditions.

- **CEPRO Sprint welding screens**

Are quality-made screens. The CEPRO Sprint welding screen can be used in diverse working conditions.

- **CEPRO Gazelle welding screens**

Ideal for use in smaller workspaces and infrequent use. They are very lightweight and can be easily moved by hand.

CEPRO GAZELLE WELDING SCREEN

The Gazelle welding screen is designed for use in small workplaces or when the use is not very frequent. When work needs to be regularly done in different places or when flexibility in the organization of the working space is required, protection with movable screens can offer a better alternative.

SONIC CLASSIC

Welding and grinding operations are one of the most important noise sources in industrial working environments. Prolonged exposure to high noise concentrations can damage ear drums and cause noise-related deafness. Besides personal suffering, this often means long term absences through illness or high costs as a result of permanent disability. In less serious cases, too much noise is often the cause of loss of concentration and consequently loss of quality and lower production volumes.

The unique, compact construction of the CEPRO SONIC wall system with built-in soundproof elements not only produces sound attenuation but also effective noise reduction in the rest of the working environment. The modular system can be easily and quickly assembled (and is therefore cost-reducing), moved, expanded or changed into another configuration. The CEPRO SONIC wall system exceeds the quality and effectiveness of all other branded systems of its competitors.

Certification

All CEPRO soundproof SONIC products were extensively tested by internationally reputed testing organisations. Measurement statistics of all tests are available. The flame extinction properties of these products were also tested where necessary.

Available models

- CEPRO Sonic Classic wall elements for building up a welding booth
- CEPRO Sonic Classic accessories, for further expanding your welding booth
- CEPRO Sonic Classic supports, to complete your welding booth
- CEPRO Sonic Classic grinding booths, fitted with sound absorbing roof.

Made to size

CEPRO can also offer you tailor made and constructed installations. This goes for dimensions, design and colour scheme. You can count on receiving professional advice from one of our advisors. Please contact our sales department to make an appointment.

Projects

CEPRO is a specialist in solutions for specific problems which occur in the welding and grinding work area. Sometimes these problems are isolated problems but mostly they are combinations and are part of an overall safety policy. CEPRO knows more than anybody else how to optimally combine the properties of its different products with those of others into a pleasant workplace which meets all safety and efficiency requirements. During the optimisation of a workplace we are in many cases also confronted with other issues which are important such as concerns about the evacuation of harmful welding gases, the supply of gas and oxygen, air conditioning, communication systems or even the most efficient way of supplying electricity to the workplace.

Many entrepreneurs therefore consider the involvement of CEPRO an ideal opportunity to optimise workplaces, straighten out logistics and workflow and upgrade general and technical aspects.

OUTDOOR WELDING

When welding in the open air it is important to be protected from all kinds of weather, such as rain, wind, sun, etc. Working conditions are noticeably improved if a welding tent or welding umbrella is used. This level of protection for the welder has proved to contribute to a reduction in sick leave.

Available products

The CEPRO outdoor welding program is divided into 2 product groups which are suitable for various applications.

CEPRO welding tents

Our welding tents are extremely suitable for work in the open air. Work can be continued for longer periods and due to the improvement of working conditions, sick leave will be greatly reduced.

CEPRO welding umbrellas

Our welding umbrellas are specially designed for working outdoors. They provide reliable temporary protection of the work site from sun or rain.

Protecting people

We protect people and the surrounding area from danger by setting up safe welding and grinding sites.

Solid operational management also means working to protect your employees and the surrounding area from danger. At CEPRO, we believe sharing knowledge about legal safety requirements forms the cornerstone of a productive business relationships and long-term partnership.

Reliable quality and service in safety

This allows us to combine all the knowledge and expertise found in today's sector in our products, services and processes. We treat every request with due care and attention and work to tailor our solutions to the individual requirements of the client or end user. And throughout, we leave nothing to chance. Working together with our client, and together with our partners. We believe that continuously investing in knowledge, training and relationships is the best guarantee for consistent and dependable quality and solid service in safety that complies with international regulations. It's what has made CEPRO the global market leader in its sector.

Happy in your job

When it comes to safety and job satisfaction, only the best is good enough for our own people too. After all, whether or not you are happy in your job depends to a large extent on how secure and satisfied you feel as an employee. When our employees feel happy, this contributes to their personal health and productivity. And this in turn has a positive impact on customer satisfaction.
